

ATTENTION PLUMBER/INSTALLER

Blue Inlet On Top Of BTI Dispenser

Only Signifies Cold-Water In

Red Outlet On Top Of BTI Dispenser

Only Signifies Hot-Water Out

CAUTION!!! Read Following Carefully

Several other brands of faucets use different colors of supply tubing that include **Blue/Red/Black**. That does not mean the faucet **Blue/Red** tubing actually connects to the **Blue/Red Inlet/Outlet** on the BTI dispenser.

Most other brands use the **Blue/Black** Tubing to connect to the Cold-Water Supply or Filtration System. **Red** Tubing connects to **Blue** Inlet on top of BTI Dispenser.

Be sure to properly identify the tubing use for your particular brand of faucet before installation.
